PROFILE

🗓 Age : 27   ⓘ Marital Status : Single

📍 Residence : Iran - Tehran   ⓘ Military Service : Exemption

I am a highly motivated and adaptable individual, always eager to take on new challenges and explore uncharted territories. My passion for innovation and my ability to learn new technologies make me a valuable asset to any team seeking to create cutting-edge web solutions.

WORK EXPERIENCE

Full stack developer freelance

Remote   2022-now

Front-end & Back-end Expertise

- building and maintaining modern web applications using Next.js and React.
- Proficient in designing and implementing user interfaces with Adobe XD and Figma.
- Design and implement data structures in MongoDB, leveraging Prisma ORM for efficient data management.
- Proven ability to build fully type-safe applications using TypeScript and Zod, ensuring code reliability and maintainability.
- Experienced in designing and implementing data management logic to ensure efficient and scalable data operations.
- Utilize server-side rendering (SSR), client-side rendering (CSR), incremental static regeneration (ISR), and static site generation (SSG) techniques for optimizing page loading and performance.
- Craft well-structured APIs for retrieving, adding, and manipulating data, ensuring type safety and data integrity.
- Develop progressive web applications (PWAs) to enhance user experience, offline functionality, and app-like engagement.

Project Experience

- Successfully built and launched several blog and e-commerce websites using Next.js and React, ensuring a seamless user experience across devices.
- Implemented type-safe data structures and APIs using TypeScript, promoting code reliability and maintainability.
- Utilized MongoDB for efficient data storage and management, leveraging Prisma ORM for data integrity and performance optimization.
- Employed server-side rendering techniques for improved search engine optimization (SEO) and enhanced page load times.
- Created progressive web applications (PWAs) to provide offline access, app-like capabilities, and enhanced user engagement.

FrontEnd Developer And Technical Support

Remote / MehrDesign   2012-2017

Technical Expertise

- Proficient in HTML, CSS, JavaScript, and PHP for developing and maintaining chat room functionalities.
- Experience in MySQL database management and data manipulation for handling user interactions and chat history.
- Familiarity with our custom chat room script for building robust and feature-rich chat rooms.
- Expertise in using CPanel for server administration and configuration of our chat rooms.

Design and Development Contributions

- Designed and developed custom chat room themes, customizing the default appearance to enhance user experience.
- Implemented interactive elements, such as user profiles, chat notifications, and real-time messaging, to enhance user engagement.
- Integrated seamlessly with our MySQL database to store chat history and user data securely.
- Maintained our chat room platform, ensuring consistent performance and addressing any technical issues promptly.
